# PROBIOTIC

According to the World Health Organisation, probiotics are living microorganisms that can provide health benefits that go beyond essential nutrition.

Probiotics have been shown to provide specific health benefits, such as supporting gut and immune health and contributing to the balance of gut microbiota. It is currently used to name bacteria associated with beneficial effects for humans, animals, and environment.

Once added to the air, probiotics function in a similar way as in our body. Probiotics help to keep the air in your indoor environment clean by providing effective and long-lasting residual cleaning in the air, on surfaces and objects.

“

*Did you know that probiotics are the most effective solution in breaking down biofilm harbouring antibiotic-resistant organisms?*

”

**CLEANS AND PURIFIES AIR, SURFACES, AND OBJECTS**

**CONTINUOUS MISTING TO REDUCE BAD ODOURS**

**100% NATURAL, CHEMICAL-FREE AND ECO-FRIENDLY**

## **TECHNOLOGY**

Probiotics support human health by balancing “good” and “bad” bacteria. Many probiotic products on the market have shown benefits for people with skin conditions, allergies, colds and oral health, weak immune systems and digestive issues. New developments indicate that Environmental Probiotics are essential for a balanced and clean indoor environment.

The solution is BetterAir; the innovator of the world’s first and only probiotic air, surface and object purification systems. Pioneering a way to introduce probiotics to the environment and using their natural intelligence to bring balance to indoor living and workplaces.

Conventional purification and cleaning methods indiscriminately kill all bacteria harmful and beneficial alike. This causes an imbalanced, sterile environment in which pathogens mutate into resilient superbugs.

Alternatively, BetterAir’s Enviro-Biotics™ compete over and deplete the resources allergens, pathogens and mould thrive on, and help in the elimination and prevention of bad odours due to microbial contamination.

Patented technology repetitively releases Environmental Probiotics known as *Bacillus Subtilis*. Billions of micron-sized probiotics form a protective layer of microflora, which coat and shield surfaces and objects, resulting in a healthy microbiome.

The beauty of the technology is that it can accommodate virtually any indoor space and every individual. Years of backtesting has proven Enviro-Biotics™ to be safe for human, pet and animal contact. They are also environmentally friendly, 100% natural and biodegradable.

REVOLUTIONISE THE WAY YOU  
BREATHE

*Improving*

# INDOOR CLIMATE QUALITY

In alignment with Indoor Climate Quality's (ICQ) guidelines, The Ingenious Air Company's motivation is to create the ultimate indoor climate.

Our ethos is 'Enhance Well-being, Enable Performance, Enrich Lives'.

We actively improve indoor air quality and ensure a comfortable and productive environment.

We strongly believe that everyone should live and work in a healthy environment.

We provide a safe haven through probiotic purification, dramatically reducing disease-causing viruses and bacteria, allergens and dust.

The advanced technology means air, surfaces and objects are purified, especially in those hard to reach areas.
